

# Delivery Dash

## Controls

- Select car - Left mouse button
- Move selected car- Left mouse button on the desired destination
- Pause - Esc key

## Walkthrough

- To start the game the player selects the play button located on the main menu.
- The game will begin and the goal is to distribute food throughout the map on specific locations. For that, the player needs to select the cars and send them to their desired destination marked by red exclamation points.
- Each car has a x amount of food and each delivery stop needs a y amount. Not all locations will require the same amount nor all cars will transport the same amount.
- Along the way, seagulls will follow the cars and try to steal their food.
- The car will have to keep moving while being chased. If a car stops while being chased by a seagull, the seagull will steal 1 food per second.
- The car is faster than the seagull so the player just has to make sure the car continues moving until it is out of the seagulls' range.
- The player wins when they have successfully completed every delivery point.
- The player loses if the timer reaches 00:00.
- If the player is not able to complete all deliveries due to losing their food to the seagulls, they won't be able to win.
